ACCESSORIES FOR COLLECTORS

Bottom plate, ABS

Solid bottom plates are available for all types of collectors, as well as universal collector models WU175, WU275, WU375 and WU475. The plates have a light gray finish and are made of anti static ABS.

The plates are removable and thus easy to be cleaned.
(see page 60-62)

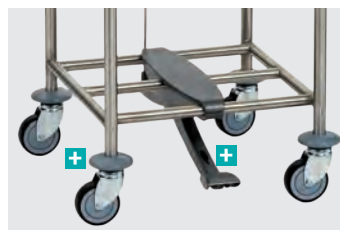

Stainless steel bottom plate

Designed for special hygienic applications.
E.g. Operation Rooms and Critical Care Units.

Fits to below mentioned collectors:

COLLECTOR	ORDER CODE
165er Series	BP 165
195er Series	BP 195
265er Series	BP 265
295er Series	BP 295

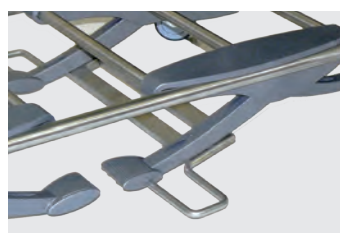

Foot pedal mechanism **LT**,
Donut bumper **SP32**

This quiet pedal mechanism has undertaken millions of rigorous test cycles. Passing these tests without the slightest abrasion.

SP31 = 65er Series
SP32 = 95er Series

The lid is opened by simply pressing the foot pedal. Every pedal is equipped with a rubber stopper to prevent the collector from sliding away, noise, and damage.

Pedal linkage

The WU DT-VBV pedal connection was developed for simultaneous operation of lids situated one behind the other for KSU 273/473, W 494, W 464 and WU 473.

Lid damping mechanism

The lid damping mechanism can be integrated in the foot pedal mechanism. Due to the damping mechanism the hinged Hammerlit lid DT 8 is slowly and silently closing.

Retrofitting is only possible for Hammerlit collectors produced and starting from the year 2000.

Stainless steel hook

Stainless steel hooks for laundry nets and refuse sacks.
(included with the 95 collector series)

LINEN WARD CARTS WITH CLOSED CABINET

! Linen ward carts are also available in **Topline** execution, made of High Pressure Laminate (HPL) coated plate with 2 mm ABS edge strip. Topline offers significantly **lower weight**.

// INFORMATION

Optional doors and drawers can be fitted with locks.

! Other color combinations (available at extra charge) see page 13.

General description and technical information for Series EWPU 40 und EWPU 41 (see page 65). Linen Ward Carts of Series EWPU 40 and EWPU 41 are available with attached grip rings (see page 65) or with Linkable Ward Carts (see page 68) and Linkable Linen Hampers (see page 72).

*Accessories for Ward Carts you will find on page 71.

LINKABLE WARD CARTS

Tiered cart and laundry collector are available in versions able to be coupled together.

Coupling is effected by using a foot-pedal, accessible from either side and without lifting the units.

(design patent DGM 20 2006 018369.8)

These units can of course also be used on their own, and to preserve hygiene they can be stored separately in the clean and unclean areas.

Tiered carts without clamping rings (models EWPU 400, EWPU 410, EWPU 410AG and EWPU 380) can be fitted with EWPUK 18 coupling equipment. This stainless steel device is fitted to the bottom at the rear of the cart and consists of a robust foot pedal and a hook mechanism.

! You will find matching coupling collectors on page 72. To retrofit earlier collectors, you will find coupler bars on page 64.

// PICTURED ACCESSORIES

GRIP RING HR 2000

The **Hammerlit grip ring HR 2000** makes it possible to securely mount a wide variety of bag types, from the Wickelsack® to polyester material bags.

! All Hammerlit collectors starting from the year 1970 can be retrofitted with the HR 2000.

Fold lip of the grip ring down.

Position the bag over the ring.

Fold the lip of the grip ring upwards ...

... thereby securing the bag.

Folded in the grip ring, the bag is now securely in place.

To remove the bag, simply pull down at the edge of the bag. This will bring the lip of the grip ring downwards to release the bag.

HAMMERLIT LIDS WITH POLYMER HINGES

+ Ergonomic handling

+ Lid secures

POLYMER LID WITH INTEGRATED HINGE PART DT 8

// SPECIAL FEATURES

- + Ergonomic handling
- + High stability
- + Noise-reduced
- + **Lid secures** against breaking-off
- + Lid can be mounted and de-mounted without tools
- + Pedal mechanism can be retro-fitted
- + Lower hinge bracket mounted on vertical tube
- + Easy to clean, eliminating from parts where dirt can accumulate
- + Lower hinge bracket protects wall from possible damage. Bracket is attached to a welded part of the frame, to prevent from slipping out of position

LID WITH INTEGRATED HINGE DT 8

Modern design available in 8 colors

LID HINGE PART

Lower hinge bracket successfully tested in more than **1.000.000 cycles**

SEPARATE LID WITH INTEGRATED HOOK D 6

// SPECIAL FEATURES

- + Lid without integrated hinge part
- + Integrated hook of the lid, enables hanging on the grip ring, when open
- + Material: shock-proof, anti-static plastic (ABS)

WIRE CONTAINER CARTS

This cart is a combination of transport cart and bulk container. Each cart has 2 folding shelves, which when folded down make the cart ideal for transporting soiled linen and laundry bags. When the shelves are folded up, fresh linen can be transported.

The **HC 173** is much more **flexible**. Nearly each conceivable shelf configuration is possible. As this wire container is easy to assemble, it can also be delivered in an economical knocked down version. (Please add UM to the model).

// DETAILS

LAUNDRY TRANSPORT SACKS WITH CORD LOCK

The **Wickelsack®** laundry transport sacks of fabric quality 100 % polyester (SM, SFM, ASM) are manufactured with 2 sewn on cord locks in red plastic.

LAUNDRY TRANSPORT BAGS WICKELSACK® WITH WOVEN TEXT

Only available for larger quantities. These laundry transport bags are also available with custom individual woven text. The text is embroidered in an approximately 50 mm wide additional middle strip. Since these bags are custom made, small deviations of quantity can occur. Please contact your Hammerlit representative for a quote.

LAUNDRY TRANSPORT BAGS WICKELSACK®, COATED

Laundry transport bags Wickelsack® are also available with a watertight PU coating. Coated bags can be washed at temperatures up to 60°. However durability is less compared to uncoated bags. Capacity: 12 kg.

LAUNDRY NETS WITH ZIPPER

These laundry nets are easy to use and do not require an additional clasp, due to the sewn-in zipper. They have a 30 % higher volume capacity than standard nets.

Also available with button clasps

! Generally laundry nets should only be filled to 40% of their maximum capacity for optimum results.

CLEAN LINEN BAGS

Transporting **clean linen** from the laundry to the linen room must be carried out under the same hygienic standards as those that apply to the transport of soiled linen.

The fresh linen should therefore be packed into a dustproof, germproof bag immediately after washing and/or sterilizing.
